sommerfeltia

4

H. B. Gjørørum & P. Sunding

Flora of Macaronesia.
Checklist of rust fungi (Uredinales).

1986

is owned and edited by the Botanical Garden and Museum, University of Oslo.

SOMMERFELTIA is named in honour of the eminent Norwegian botanist and clergyman Søren Christian Sommerfelt (1794-1838). The generic name *Sommerfeltia* has been used in (1) the lichens by Flörke 1827, now *Solorina*, (2) Leguminosae by Schumacher 1827, now *Drepanocarpus*, and (3) Compositae by Lessing 1832, nom. cons.

SOMMERFELTIA is a series of monographs in plant taxonomy, phytogeography, phytosociology, plant ecology, plant morphology, and evolutionary botany. Most papers are by Norwegian authors. They are in English or, less often, in Norwegian with an English summary. An article must be 32 printed pages or more to be accepted. Authors not on the staff of the Botanical Garden and Museum in Oslo pay a page charge of NOK 30.00.

SOMMERFELTIA appears at irregular intervals, one article per volume.

Editor: Dr. Anders Danielsen.

Editorial Board: Scientific staff of the Botanical Garden and Museum.

Address: SOMMERFELTIA, Botanical Garden and Museum, University of Oslo, Trondheimsveien 23B, N-0562 Oslo 5, Norway.

Order: On a standing order (payment on receipt of each volume) SOMMERFELTIA is supplied at 30% discount.

Separate volumes are supplied at the prices indicated on back cover.

ISSN 0800-6865

Gjærum, H.B. & Sunding, P. 1986. Flora of Macaronesia. Checklist of rust fungi. - Sommerfeltia 4: 1-42. Oslo. ISBN 82-7420-000-4. ISSN 0800-6865.

This is the first checklist of rust fungi in Macaronesia (the Azores, the Madeira archipelago, the Salvage Islands, the Canary Islands, and the Cape Verde Islands). One hundred and thirty-four rust taxa are recorded, making more than four hundred rust-host combinations. Names on rust and host species used in the literature are listed, with references to the names used in the checklist.

Keywords: Macaronesia, Azores, Madeira, Salvage Islands, Canary Islands, Cape Verde Islands, Uredinales.

Halvor B. Gjærum, Norwegian Plant Protection Institute, Division of Plant Pathology, P.O.Box 70, N-1432 AS-NLH, Norway.

INTRODUCTION

The present checklist of Macaronesian rust fungi (Uredinales) is compiled on the basis of extensive field work and from the literature available to us. The concept and nomenclature of the rust species mainly follow those used by Jørstad (1959, 1962, 1966), the basic publications on rust fungi in the Canary Islands. In his first publication he also listed rusts from the other groups of islands in Macaronesia as well. The host names mainly follow Hansen & Sunding (1985).

As both rust species and host plants have been published under different names, synonyms are listed separately with references to the names used in the main list.

The first author (H.B.G.) is responsible for all mycological data presented, whereas host plant identifications and host plant nomenclature have been the latter's (P.S.) responsibility.

We thank Mrs. Rannveig Ødegaard, Norwegian Plant Protection Institute, who has typed and corrected the manuscript several times. The Norwegian Research Council for Science and the Humanities has given financial support to the authors' field work in Macaronesia.

The abbreviations used in the head of the table correspond to those used by Hansen & Sunding (1985):

Azores archipelago

A: Azores in general
S: Santa Maria
M: São Miguel
T: Terceira
G: Graciosa
P: Pico
J: São Jorge
F: Faial
L: Flores
C: Corvo

Madeira archipelago

M: Madeira
D: Desertas
P: Porto Santo

Salvage Islands

S: Salvage Islands

Canary Islands archipelago

L: Lanzarote
F: Fuerteventura
C: Gran Canaria
T: Tenerife
G: Gomera
H: Hierro
P: La Palma

Cape Verde Islands archipelago

A: Santo Antão
V: São Vicente
L: Santa Luzia
N: São Nicolau
S: Sal
B: Boavista
M: Maio
T: Santiago
F: Fogo
R: Brava

INSTRUCTIONS TO AUTHORS:

SOMMERFELTIA accepts scientific papers of 32 printed pages or more, preferably in English, more rarely in Norwegian with an English summary (200-500 words). The abstract must be in English and not exceed 300 words. The author is responsible for ensuring that the English is linguistically correct. The editor reserves the right to transfer suitable manuscripts to Blyttia or the Nordic Journal of Botany.

Manuscripts to SOMMERFELTIA must not have been published or accepted for publication elsewhere.

Manuscripts will be examined by the editor, and a member of the editorial board will act as a referee. Manuscripts must be submitted in three typewritten copies with double spacing and a wide margin. The following must be typed on separate sheets: the title, the author's name and address, an abstract, legends to figures, headings to tables.

Figures (incl. line drawings) should preferably be 14.0 cm broad and not higher than 20.8 cm - the type area. Narrower and broader figures may be accepted. Tables must be typed in COURIER types on a typewriter with disposable ribbon - for direct reproduction.

The table headings should be typed with single spacing over the whole width of the table. An open line is left between the table heading and the table proper. Tables should be 14.0 cm broad. Tables over two pages, a left-hand and a right-hand page, can be accepted. Tables placed at right angles to normal text should be 20.8 cm broad. Tables divided on more pages can be accepted; on the second and later pages the table heading should be Table x, continued (Engl.) or Tabell x, fortsatt (Norw.).

Figures and tables should be numbered separately and consecutively with Arabic numerals. Black and white photographs can be included only after agreement with the editor. Coloured illustrations are normally accepted only when paid for by the author. Taxonomic keys should have right margins and be based on dichotomies. References should be written according to current practice in the Nordic Journal of Botany. SOMMERFELTIA permits abbreviations of titles to differ from the World List of Scientific Periodicals, but the abbreviations must be consistently used.

An author is supplied with ten copies free of charge. When there are more than one author, each receives eight copies free of charge. Additional copies may be ordered at subscription cost.

Volume 1. A. Hansen & P. Sunding: Flora of Macaronesia. Checklist of vascular plants. 3. revised edition. 167 pp. NOK 70.00. (January 1985.)
